Objective

Currently pursuing M.Sc. Health Informatics, with hands-on experience in Full-Stack Development, Machine Learning, and Data Analytics. Proven ability to build secure, data-driven applications and develop predictive models. Seeking a role in Healthcare Technology, Information Technology, or Data Science where I can deliver measurable impact.

Education

M.Sc. Health Informatics (Healthcare IT Management) Manipal College of Health Professions (MCHP), Udupi, Karnataka	Sept 2024 – Present
Bachelor of Pharmacy (B.Pharm) KVSR Siddhartha College of Pharmaceutical Sciences, Vijayawada • CGPA: 7.7	Oct 2019 – Sept 2023
Class XII – Science (PCB) Sri Viswasanthi Educational Institutions, Andhra Pradesh • Percentage: 80.8%	June 2017 – May 2019
Class X NSM Public School, Vijayawada, Andhra Pradesh • CGPA: 6.8	June 2009 – May 2017

Experience

Full-Stack Developer Intern, KSPCare • Built a full-stack Laboratory Information Management System (LIMS) using C# and ASP.NET Core MVC for pathology workflows and appointment scheduling. • Designed a secure PostgreSQL database with Entity Framework Core managing patient profiles, appointments, and medical records. • Implemented a role-based dual-portal system with patient booking interface and staff dashboard for real-time updates. • Secured sensitive medical data using ASP.NET session management and server-side authentication protocols.	Feb 2026 – Present
AI & Machine Learning Intern (Online), Maincrafts Technology • Developed ML models for regression and classification using Python, Scikit-learn, and ensemble methods. • Optimized model performance through feature scaling, cross-validation, and hyperparameter tuning (GridSearchCV). • Evaluated models using key metrics (RMSE, R^2 , F1-Score, ROC-AUC) and built end-to-end ML pipelines.	Jan 2026 – Present
Research & Development Chemist, Divis Laboratories, Telangana	Jan 2024 – June 2024
Pharmacist (Internship), Lakshmi Srinivasa Medical Store, Vijayawada	May 2022 – July 2022

Projects

Breast Cancer Detection using Supervised Machine Learning • Built supervised ML models for breast cancer detection using structured clinical datasets. • Achieved 99% accuracy with Logistic Regression and 100% precision using Support Vector Machine (SVM). • Performed data preprocessing, feature selection, model training, and evaluation. • Applied metrics including accuracy, precision, and confusion matrix for model validation.	Jul 2025 – Aug 2025

Manipal Academy of Higher Education (MAHE), Manipal

Pharmacy Web Portal (HTML, CSS, JavaScript)

Sept 2024 – Dec 2024

- Designed and developed a pharmacy-focused web portal using HTML, CSS, and JavaScript.
- Implemented responsive layouts, forms, and UI elements with focus on usability.
- Strengthened understanding of frontend development applied to pharmacy systems.

Manipal Academy of Higher Education (MAHE), Manipal

Skills

Python | Machine Learning | SQL | Data Analysis | C# | ASP.NET Core | PostgreSQL | Git | Scikit-learn | Statistical Analysis

Certifications

- Google Data Analytics Specialization – Google
- Programming in Python – Meta
- Healthcare Data Quality & Governance – University of California, Davis
- Generative AI for Healthcare – Google Cloud
- Data Analysis with R Programming – Google
- Research Methodologies – Queen Mary University of London
- Quantum Data Analytics Job Simulation – Forage
- Accenture Data Analytics & Visualization Job Simulation – Forage
